

CBA Environmental Policy

CBA is one of the leading landscape, environmental and heritage consultancies in the UK, and environmental sustainability has been central to our business for over 40 years.

We are committed to protecting the environment and preventing pollution through compliance with our relevant legal and regulatory obligations. We are also committed to continually improving and monitoring our environmental performance as an integral part of our business strategy. We will encourage our clients, suppliers and other stakeholders to do the same.

We are committed to promoting resource efficiency (including water conservation, waste minimisation and recycling) in the workplace and procuring office supplies from sustainable sources in accordance with regulatory requirements and good practice.

In response to the climate emergency declared by the UK Government, our goal is to reduce our carbon footprint through year-on-year carbon emission reductions per capita with a target of becoming carbon neutral by 2030. We will do this by:

- 1. Wherever possible, reducing business travel by car and plane throughout the UK and internationally through:**
 - **Promoting video/tele-conferencing as an alternative to face-to-face meetings**
 - **Favouring use of public transport (train/bus/coach) or cycling**
 - **Choosing green vehicles when hiring a car is necessary**
 - **Encouraging sustainable travel to work behaviour among employees**

- 2. Procuring electricity supplies from sustainable renewable energy sources.**

This Environmental Policy is communicated to our employees, clients and suppliers via our website.

A handwritten signature in black ink, appearing to read 'D. Wath', enclosed in a simple oval shape.
