## Gatwick Airport, UK

2014 The Wildlife Trust Biodiversity Benchmark Award

For over 15 years, CBA has provided environmental and landscape services for the planning and implementation of numerous major developments at Gatwick Airport. These include the expansion of aircraft standing areas and associated construction of acoustic/visual bund and diversion of the River Mole in the North West Zone; extension of the North Terminal; construction of new flood storage attenuation and pollution lagoons; strategic landscape and ecological management strategy advice for the entire airport's landholdings; and an environmental review of the airport's biodiversity obligations and targets.
