CBA has provided a range of landscape masterplanning and design services at Gatwick Airport over the years. This work included the preparation of a comprehensive Landscape Strategy for Gatwick Airport to inform future development plans. The strategy established a practical landscape vision and masterplan to help integrate the airport into its countryside setting, and sets out practical landscape design and management guidelines for the airport's entire landholdings. This work has continued to be a key influence on landscape and nature conservation management in support of strategic mitigation for the airport. In addition, CBA has provided landscape design services for specific projects at Gatwick, such as diversion of the River Mole in the North West Zone, and expansion of car parking and public realm design for office developments.
